

Actuator Heaters

24-inch Actuator Heater - 30-inch Actuator Heater - 36-inch Actuator Heater - 48-inch Actuator Heater

This product wraps around the tube of your actuator and is insulated with a two plastic outer tubes. This will keep the grease inside your actuator warm and soft and allow it to operate normally even under extreme low temperatures. Your positioner will also work better because it depends on clean pulses coming from the reed sensor and this only happens when the actuator can move quickly (frozen actuators that move slowly produce smaller pulses).

FEATURES

- 85W Power Rating (120V)
- Operates down to -40°F (-40°C)
- Power indicator light
- Energy saving thermostat

INCLUDES

- 12ft Heating Cable
- Thermostat
- Two 24-inch insulating tubes
- Two 3-inch insulating tubes
- Tie wraps

TECHNICAL

Specification	Value
Technical	
Input Voltage	120V AC
Heating Cable Length	12ft
Large Tube Insulator Length	24" (61cm)
Small Tube Insulator Length	3" (7.6cm)
Environment	+5°C to -40°C
Shipping Details	
Single Box	24"x6"x3" Rectangular (3 lbs)
