

The KING UC1000 is a Universal Controller that makes the KING Quest™ satellite TV antenna compatible with a variety of satellite receivers from DIRECTV®, DISH® and Bell™ (Satellite TV service and receiver not included). The UC1000 lets you easily change from one satellite TV service provider to another on your KING Quest; no need to buy a new satellite antenna if you use multiple satellite providers or change providers. Also includes a built-in security alarm to protect your satellite TV antenna investment. Easy-to-follow initial setup instructions included. Made in the USA.
