

## DISH Playmaker Portable Satellite Antenna

### Description

---

Works exclusively with DISH SD/HD programming, providing satellite signal to one DISH receiver.

Works with DISH Pay-As-You-Go ViP 211z or DISH Wally receivers (sold separately)

Powered through receiver, only requiring coax cable-- no separate power cord

Very compact at only 14.3" dia. x 13.5"H

Views Western Arc satellites at 110°, 119° or 129°

Automatically toggles between satellites as you change channels

Fully automatic with fast, easy setup through receiver interface—just choose your state

Supports one receiver

Works with optional Over-The Air Tuner (sold separately) to connect with existing over-the-air antenna to bring in local stations

Compatible with Carryout Tripod and Satellite Antenna Storage Bag (both sold separately)

Convenient carry handle doubles as security loop

Not designed for roof mount

Includes 25' RG-6 coax cable and user manual

Mfr. 2 year parts, 1 year labor warranty
