

## Winegard RoadTrip T4 Satellite Antenna

### Description

---

RoadTrip T4 In-motion Automatic Satellite Antenna works with DISH, DIRECTV and Bell TV programming for ultimate viewing versatility.

Sleek, compact roof-mounted satellite antenna is ultra-lightweight and features the smallest footprint of RV roof-mounted antennas, requiring minimal roof space. With easy one-button operation, the RoadTrip T4 is 100% automatic with full in-motion tracking capability. New motors and updated tracking algorithms reduce noise levels and improve tracking capabilities for quicker recovery when signal losses occur behind trees, bridges and other obstructions.

### Features

Updated design reduces noise and improves tracking ability

Fully automatic, one-button operation with full in-motion tracking capability

Smooth rounded dome and enhanced design provide maximum signal strength

Antenna points to correct satellite when you change channels

Receives DISH and Bell TV SD and HD and DIRECTV SD programming on: DISH satellites 110°, 119° or 129°, DIRECTV satellites 101° or 119°, and Bell TV satellites 82° or 91°

Compatible with DISH Pay-As-You-Go receivers and programming and DIRECTV receivers and 2-year programming packages (receivers and program packages all sold separately)

Two coaxial outputs allow two-receiver or dual-tuner DVR use

Only 14.3" dia. x 13.5"H and weighs only 10 lbs. vs. Mission at 20" dia. x 12.9"H and weighing 14 lbs.

Includes 25' coax, 25' 12-volt power cable, 3 mounting feet and user manual

Winegard 2 year parts/1 year labor warranty protection

### Technical Specs

---

Tech Specs

Weight: 15.6 lbs.

Manufacturer: Winegard Co

Mfg Part #: RT2000T

Tech Notes:

With 2 TVs, secondary receiver only receives channels located on satellite to which antenna is originally tuned for primary receiver (not all programming may be available)

Not compatible with DISH Hopper/Joey or DIRECTV H25, HR34 or HR44 receivers (unless the Winegard SWM-840 accessory kit is added; sold separately)
