

OR

Description

The smallest portable satellite antenna stands only 14.3" dia. x 13.5"H and weighs only 10 lbs. Fully automatic—just select your state and the Pathway X1 automatically finds DISH satellites. Faster satellite acquisition than other automatic antennas. Requires no separate power cable--powered by coaxial cable from the primary receiver. Watch programs on up to two TVs (two receivers required). Easily converts to roof mount (roof mount kit sold separately). Integrated security handle lets you lock it up to prevent theft. Compatible with DISH Pay-As-You-Go ViP 211z Receiver (sold separately) for SD and HD programming (receiver and programming package sold separately). Mfr. 2 year parts, 1 year labor warranty.

Technical Specs Tech Specs

Weight: 13.6 lbs. Dimensions: 14.3" dia. x 13.5"H
