

HOTSHOT DISH HEATER

PRODUCT DESCRIPTION

The HotShot brand heaters are an exclusive patented invention of Perfect 10. Our heaters have been offered for over 13 years and are used by many thousands of dish owners in snowy climates to aid reception when the weather gets testy.

An optional LNBF support arm heater HS14ARM can be connected to this device to prevent snow buildup on the support arm. The arm heater switches on and off in synchronization with the dish heater element.

GENERAL SPECIFICATIONS

- Safe low-voltage 26 VDC heater
- Does not require hiring a licensed electrician for installation
- Automatic thermostat turns 'on' just above freezing temperatures and 'off' when the dish surface warms up
- Durable Vinyl material lasts a long time
- Etched foil resistance heating element
- Multiple heat zones apply the maximum heat where it's needed most
- 3M Acrylic adhesive assures a tight bond to the antenna
- Conforms to the reflector curves and angles
- One hundred feet of electrical cable provided
- Heavy-duty switching power supply provided

ELECTRICAL

Provided Power Supply: HSPSKIT3
 Provided Wire: UV resistant 16 ga stranded two-conductor
 Thermostat Closed: 49°F ± 10°F
 Thermostat Open: 70°F ± 5°F
 Heat Output: 125.4 watts ± 10% (Ref 26VDC @ 32°F)

PACKAGING

Silver in color, vinyl only.
 Heater blanket, power supply and 100' x 16 ga 2 conductor in this kit.
