INTRODUCTION

Thank you for buying the SDM-2130 MPEG-2 SD Encoder Modulator Combo. Please read this manual carefully to install, use and maintain the modulator in the best conditions of performance. Keep the manual at hand for future reference.

General description

Main features

- ◆ 2U design
- ◆ Quick Boot-up
- ◆ Covers frequency range from 54 to 860MHz
- ◆ Local control via friendly front button Control Panel
- ◆ Remote control via supplied utility

SAFETY INSTRUCTION

All the safety and operating instructions should be read before the product is operated. For safety purpose all instructions are adhered to.

Cleaning

Unplug the unit from the rack before cleaning. Do not use liquid or aerosol cleaners, use a damp cloth.

Attachments

Do not use attachment that are not recommended by manufacturer as they can cause hazards.

Water and moisture

Do not use this product near water.

Mounting

Ensure the unit is rack mounted securely on the wall or in the 19" cabinet as not to cause harm to anyone or to damage the product by being dislodged.

Power cord protection

Power-supply cords should be routed so they are not pinched or placed where they could cause a trip hazard.

Ventilation

Slots and openings in the housing are provided for ventilation to prevent overheating and ensure reliable operation. These openings should never be blocked or covered by placing the unit on a carpet, flooring, furniture or fabric surface. The unit should not be placed in a built-in structure such as a cupboard or rack unless proper ventilation is provided.

Power source

This unit should only be operated from the type of power source indicated in the technical specification (page 3 of this manual).

Lightning

For added protection of this unit; unplug it from the wall when left unattended or unused for long periods of time and disconnect the cable system. This will protect the product from lightning strike or power surges

Object and liquid entry

Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out part that could result in a fire or electric shock. Never spill liquid of any kind on the unit.

Servicing

Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Damage requiring service

Unplug this unit from the wall or the cabinet and return it to the qualified service personnel for servicing if any of the following occurs:

- The power supply cord or plug is damaged.
- Liquid has been spilled, or objects have fallen into the unit.
- The unit has been exposed to rain or water.
- If the unit has been dropped or damaged in anyway.

Heat

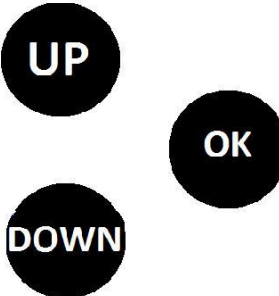

The unit should be positioned away from any heat source such as radiators, fireplaces, cooking stoves, or other products (including amplifiers) that produce heat.

SPECIFICATIONS

<p>VIDEO</p> <p>Input format: (CVBS) Audio/Video Port number: 2 programs in one carrier Encoding format: MPEG-2 Video (ISO/IEC 13818-2) MPEG-2 MP@ML Resolution: 480i: 720×480, 60Hz Aspect Ratio: 4:3, 16:9 manual selectable, 4:3 default</p>	<p>RF OUTPUT</p> <p>Channel range: CH2-CH134 STD channel plan Frequency range: 54-860 MHz Output level: +15dBmV to +30dBmV QAM mode: ITU-T J.83, Annex B 64, 256QAM MER: 38dB minimum Output impedance: 75</p>
<p>AUDIO</p> <p>Port number: 1 & 2 Input format: Stereo (L/R) (10K) Encoding format: MPEG-1 Audio Layer II (ISO/IEC 1117-3) Sampling rate: 48 KHz</p>	<p>CONTROL</p> <p>Local operation: Figure 8 number LED, Buttons Remote operation: Web browser</p>
<p>STREAM</p> <p>TS Mux: Mux 2×Video & 2×Audio transport stream PSIP: MGT/CVCT/STT Closed Caption: EIA-608</p>	<p>GENERAL</p> <p>Dimensions: 68×50×250 mm Weight: 0.8 kg Power source: DC 12V@440mA / DC 5V@920mA PWR. consumption: 10W</p>

OPERATION

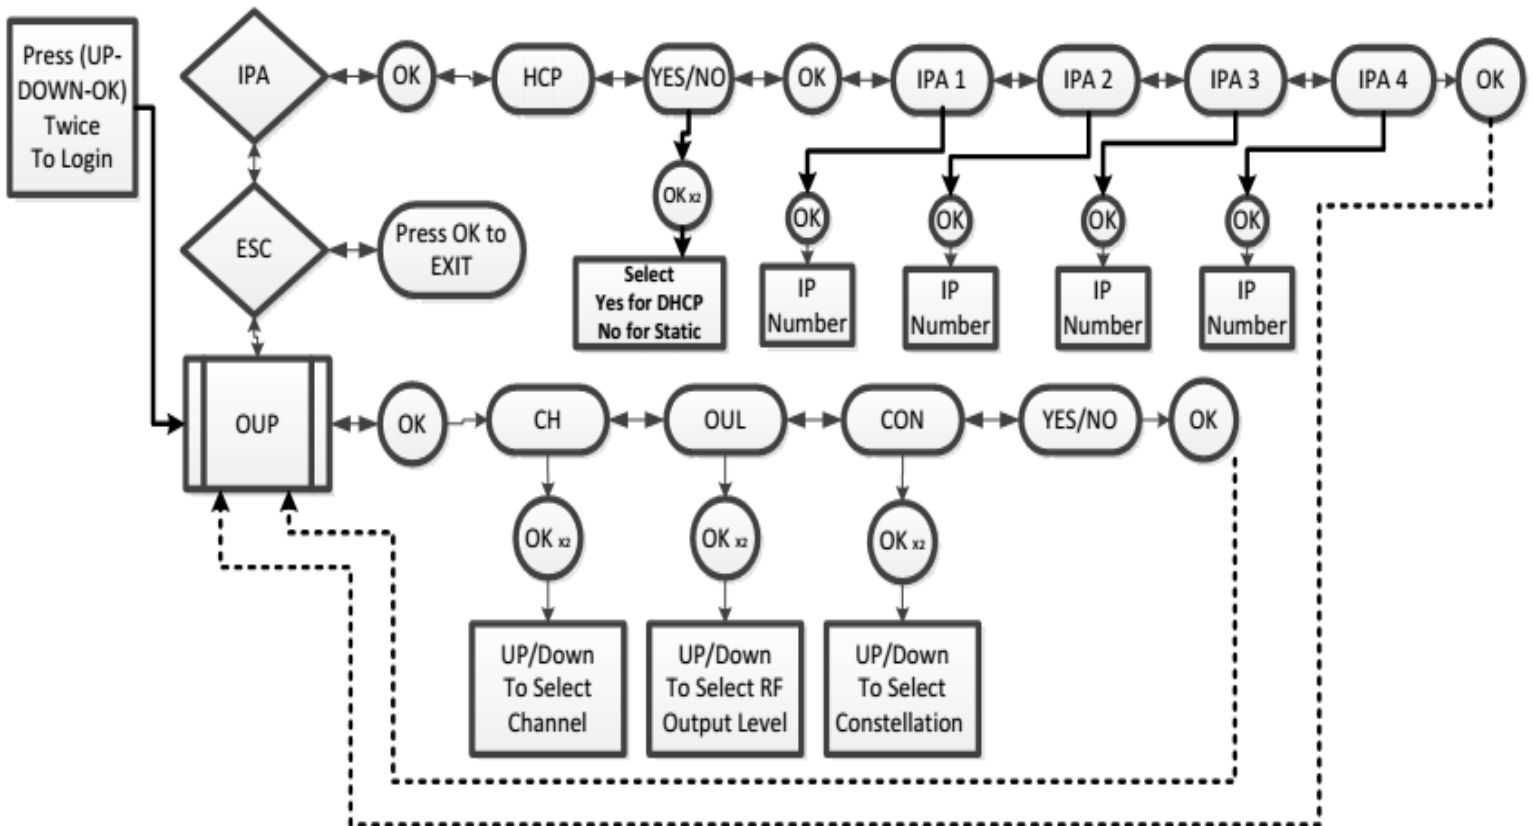

Manual Operation- Via Push Button and LED Display Web Interface/ Remote Operation – Via LAN Port

	<p>Manual Operation</p> <p>To enter the Menu in manual mode, use this sequence of key strokes: Key strokes = Press UP arrow, DOWN arrow, and OK. Do this two times! OUP should appear</p> <p>To navigate through the menus refer to System LED Function Outline along with the Navigational Flowchart.</p>
---	---

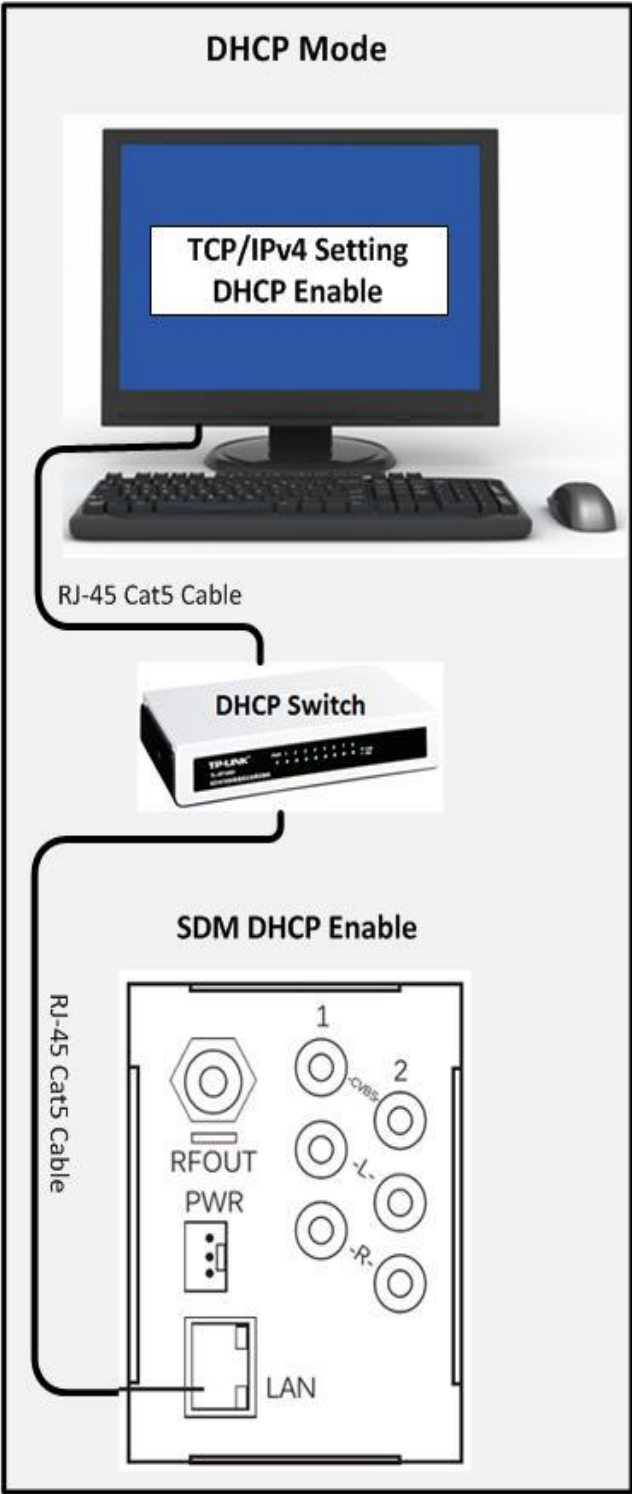

SYSTEM LED FUNCTION OUTLINE

OUP	Press the OK button on OUP to enter the 'Output' mode.
CHA	Press the OK button to access channel adjustment mode. Use the UP or DOWN buttons to set the channel number. Press OK button to save the channel assigned. (CH2-CH134).
OUL	Use the same steps as above to set the Frequency Output Level (+15dBmV-+30dBmV).
COM	Use the same steps as above to set the Constellation (ITU-T J.83, QAM256).
N / Y	Press the UP or DOWN buttons to select YES or NO. Select ' y ' for yes, all changes made will be stored in the memory. Select ' n ' for no to cancel.
IPA	Following the flow charts to enter the 'IPA' IP address mode.
IP1	Press OK to enter IP adjustment mode. Use the UP or DOWN buttons to set the first number of IP1. Press the DOWN button to advance to the next digit and UP and DOWN button to set (0-999). Press the OK button to save.
IP2	Use the same steps as above to set the IP2 numbers. (0-999)
IP3	Use the same steps as above to set the IP3 numbers. (0-999)
IP4	Use the same steps as above to set the IP4 numbers. (0-999)
IPA Y/S	When all the sections in 'IPA' completed Press the UP or DOWN Button to select YES or NO. Select ' y ' for yes, all the settings above will be stored in the memory. Select ' n ' for no to cancel.
ESC	Press the OK button to exit to system home screen interface.

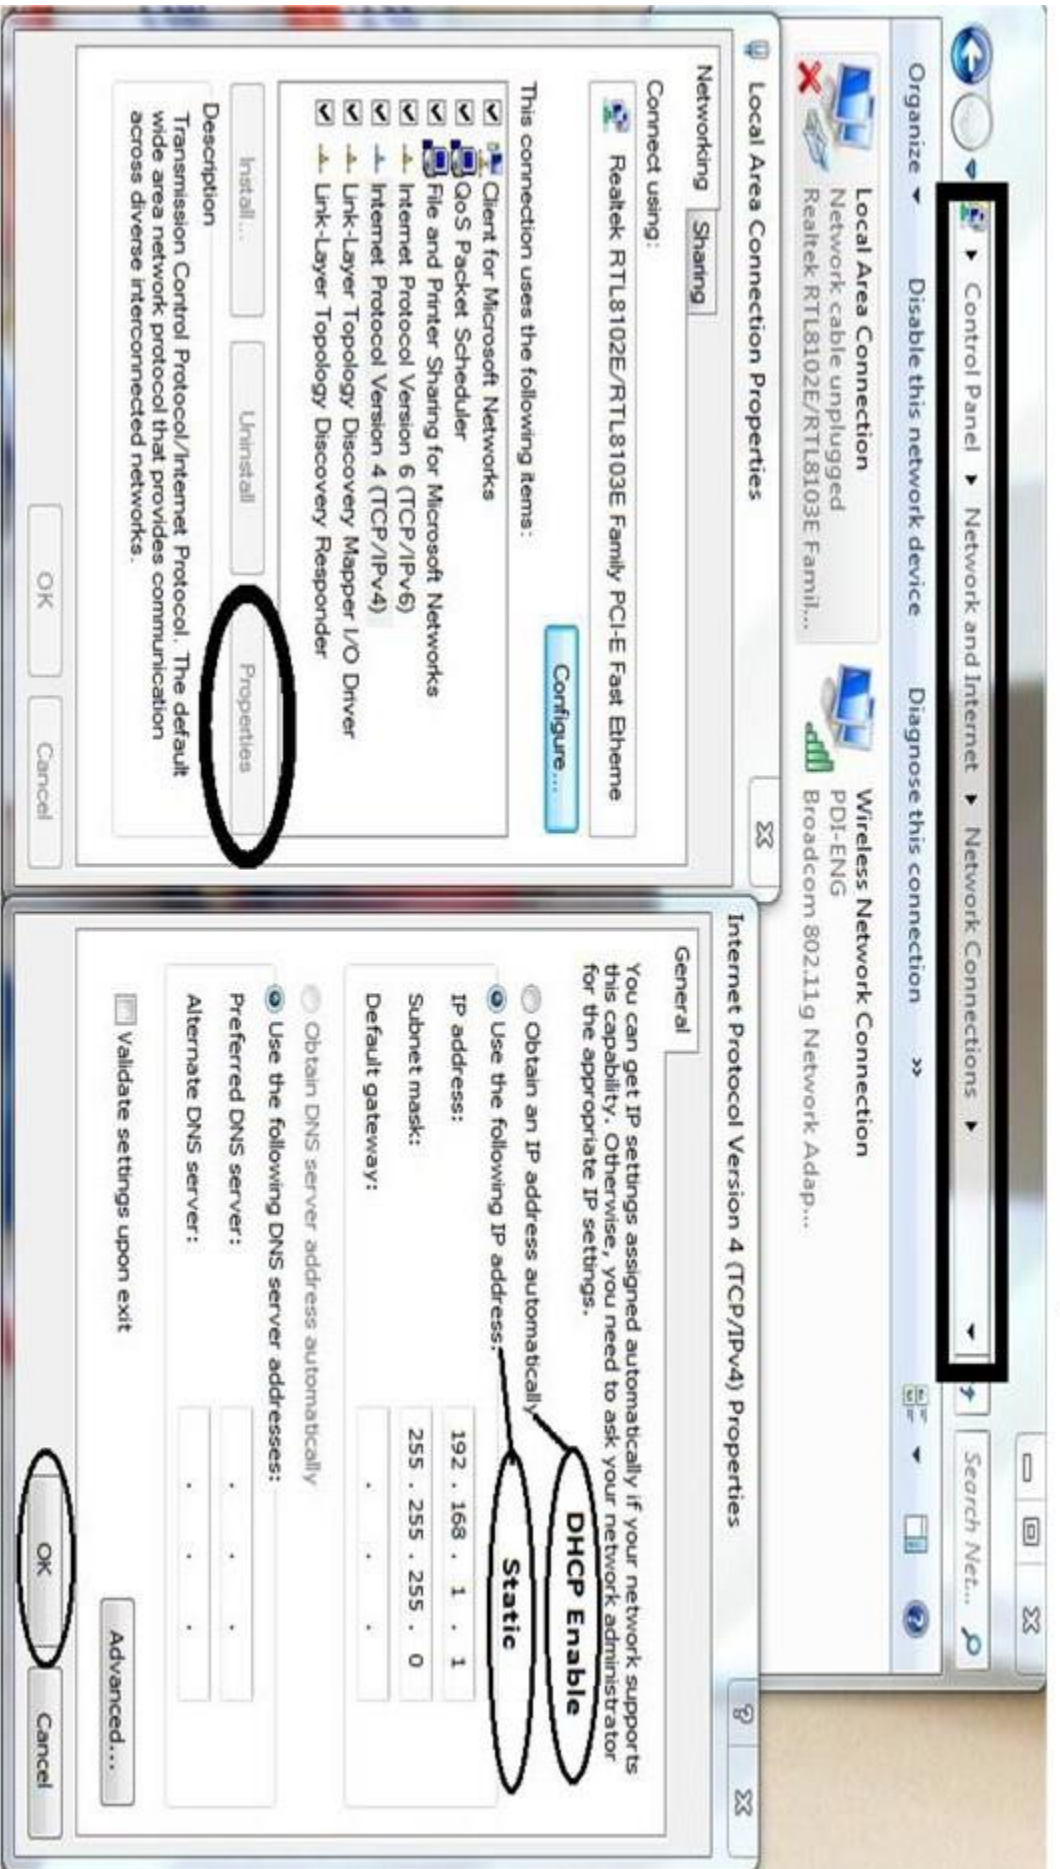

NAVIGATIONAL FLOWCHART

Network Connection

TCP/IP Setting

- STEP #1:** Control Panel-Network and Internet -Network Connections
- STEP #2:** Right Click on Local Area Connection and select Properties
- STEP #3:** Select TCP/IPv4 then click on Properties
- Step #4:** Select Mode for DHCP or Static
{Note: DHCP switch is required in order to use DHCP mode}
- Step #5:** Click on OK then Close.
{Note: For static mode please enter the above IP/Subnet mask}

WEB INTERFACE CONNECTION

Ethernet connection

The web browser allow the user fully configure the SB- SDQM-2130 unit via an Ethernet connection and a web browser.

- A.** Connect the PC to the LAN port of the SB-SDQM-2130 unit. See below diagram.
- B.** The configuration process must be made in local mode; although later you will be able to access the unit from any PC in the LAN.
- C.** Launch the web browser and enter the SB-SDQM-2130 IP address. See Flowchart for instruction.

System Login

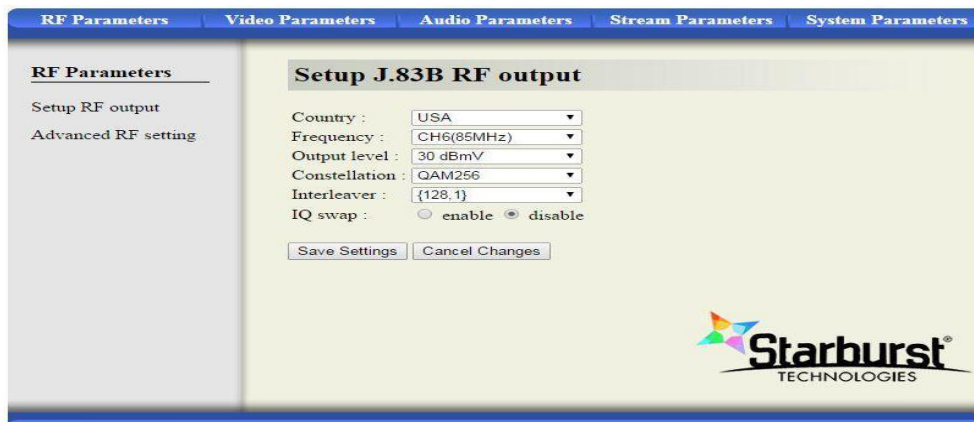

Enter the default password '1234' to Login.

Note: Password can be changed after logged in under System parameters tab.

RF Parameters

User can edit the parameters such as Country, Frequency, and Output Level etc.

Video Parameters

User can edit the video source and Tune color in 'Video Parameters'.

The screenshot shows the 'Video Parameters' configuration page. At the top, there are five tabs: 'RF Parameters', 'Video Parameters', 'Audio Parameters', 'Stream Parameters', and 'System Parameters'. The 'Video Parameters' tab is selected. On the left side, there is a sidebar with two options: 'Set video source' and 'Tune color'. The 'Tune color' option is selected. The main content area is titled 'Tune color' and contains the following settings:

- Port : 1 (with a green checkmark and 'OK' text)
- Contrast : 20 (range 0~50)
- Brightness : 21 (range 0~50)
- Hue : 25 (range 0~50)
- Saturation : 35 (range 0~50)

At the bottom of the settings area, there are two buttons: 'Save Settings' and 'Cancel Changes'. The Starburst Technologies logo is located in the bottom right corner of the page.

Audio Parameters

User can set the encoder rate in 'Audio parameters'.

The screenshot shows the 'Audio Parameters' configuration page. At the top, there are five tabs: 'RF Parameters', 'Video Parameters', 'Audio Parameters', 'Stream Parameters', and 'System Parameters'. The 'Audio Parameters' tab is selected. On the left side, there is a sidebar with one option: 'Set audio'. The 'Set audio' option is selected. The main content area is titled 'Set audio' and contains the following settings:

- Port : 1
- Encoder Rate : 128 Kbps

At the bottom of the settings area, there are two buttons: 'Save Settings' and 'Cancel Changes'. The Starburst Technologies logo is located in the bottom right corner of the page.

Stream Parameters

User can set channel name, PID and major channel number in 'Stream Parameters'.

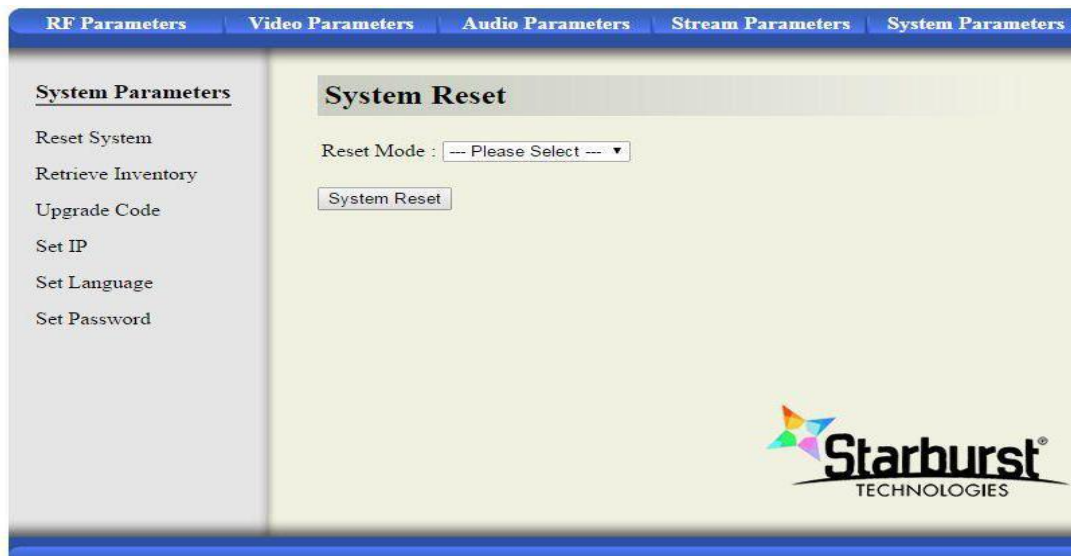

The screenshot shows the 'Stream Parameters' section of a web interface. At the top, there are five tabs: 'RF Parameters', 'Video Parameters', 'Audio Parameters', 'Stream Parameters', and 'System Parameters'. The 'Stream Parameters' tab is active. On the left, there is a sidebar with three options: 'Set Channel name', 'Set PID', and 'Set VCN'. The main content area is titled 'Set Channel name' and contains a 'Port' dropdown menu set to '1', a 'Channel name' text input field containing 'SDCH-1' with a note '(At most 7 characters)', and two buttons: 'Save Settings' and 'Cancel Changes'. The Starburst Technologies logo is in the bottom right corner.

System Parameters

User can reset the system or retrieve inventory in 'System Parameters'.

The password configuration enable user to change the password for access to the web interface of SB-SDQM-2130.

The screenshot shows the 'System Parameters' section of a web interface. At the top, there are five tabs: 'RF Parameters', 'Video Parameters', 'Audio Parameters', 'Stream Parameters', and 'System Parameters'. The 'System Parameters' tab is active. On the left, there is a sidebar with six options: 'Reset System', 'Retrieve Inventory', 'Upgrade Code', 'Set IP', 'Set Language', and 'Set Password'. The main content area is titled 'System Reset' and contains a 'Reset Mode' dropdown menu set to '--- Please Select ---' and a 'System Reset' button. The Starburst Technologies logo is in the bottom right corner.
