Ku-Band VSAT Outdoor Block-Up Converter

ALB128 Series Ku-Band BUC (Block-Up Converter) is a highly cost-effective RF outdoor transmitter for satellite communication. The BUC has very high output power linearity and works well from -40°C up to 60°C . The BUC also has a wide input voltage range which allows it to work from 18V to 60V.

Agilis Ku-Band BUC is designed for high reliability operation in various applications such as flyaway antenna. The BUC also has the most complete M&C features in the industry.

Easy to install, it is redundancy-ready and field-proven for any harsh operating environment. It is suitable for both data and voice communication operating in different modulation formats.

Agilis Ku-Band BUC is a compact design that comprises of Upconverter, Solid State Power Amplifier, Phase Locked Oscillator and DC-DC power converter. It employs L-Band IF interface to the indoor unit. Agilis ALB128 Ku-Band BUC is an ideal design suitable for broadband applications (such as DVB-RCS) in satellite IP networks.
