

SSP-10/2150A Satellite Power-Conditioned Distribution System

- Distribution system compactly combines LNB powering, signal separation and amplification in a single rack space
- 5 Amplified outputs per polarity provide for multiple receiver flexibility
- Single polarity configuration provides 9 outputs for maximum receiver operation
- Automatic current sensing enables short circuit shutdown protection to safeguard from potential damage while servicing LNBS
- Front panel LEDs provide quick and easy LNB open-or-short status monitoring
- Dual independent 1000mA high-capacity supplies have ample power reserve to reliably feed multiple line amplifiers
- UL-approved external universal AC power adapter for domestic and international use

Specifications

Bandwidth	950~2150MHz
Inputs	2
Outputs	10
High Level Output x 2	5dB
Standard Output x 8	1dB
Isolation H / V	40dB
LNB Voltage	18VDC
LNB Current	240mA
Ripple Voltage (max)	20mA
Impedance	75Ω F-Female
Input Voltage	24 VDC @ 1A
Dimensions	19" (L) x 3" (D) x 1.75" (H)
Weight	6.5 lbs.
