

## **Ku Fixed Feedhorn (Prime Focus)**

Single and Dual Ku Feedhorns Prime focus

Receive vertical or horizontal polarities one at a time and fills the need for an economical dedicated feed. The LNB is installed directly to the WR-75 waveguide. There are 4 feed mounting holes provided on the WR-75 transition.

## **Dual Ku Feedhorn**

Ku Band Single Polarity Prime Focus Feedhorn is designed to be used with prime focus satellite dishes ranging in size from 1.2m to 4.5m. The feedhorn can be used with a single polarity Ku Band LNB for reception of either vertical or horizontal signals on prime focus parabolic dishes

## **Ku Polarizer Feedhorn**

Ku-Wideband Polarotor features a wide bandwidth for worldwide reception of linear polarized Ku-Band signals. The Ku-Wideband Polarotor incorporates probe design and reliable servo motor.
